Preface

From the heights of heaven to the depths of hell the communication relies on language - the power of words. The movement of the world records the fact that the red means for the competent ones. The margin which the competent ones from others is their ability to use efficiently and with proficiency. In such a milieu, the children which occur among children are a disturbing phenomena which the growth and development of the society. Language is one of the emerging areas which deals with relating enigmas related to language acquisition, comprehension and production. Finding a panacea to the problems related to language use is actually the need of the hour. As such, this study intends to cover the areas related to language disabilities within a particular geographical area, its prevalence and the measures which can be adopted for overcoming this issue. The research based on a broad understanding on the theme of language disabilities which usually occurs among children by particularly focusing on language acquisition and comprehension all the time, presenting the suggestions for improving the language proficiency among such groups.
