1	MOHAMMED MUBARIS SAFNA. PP BIJITH PP GOVIND. S GUIDE: FAREEDHA.P	E-Commerce APP In this app, all nearby and local stores display available products including groceries. You, the user, can add items to your cart and make your order. The system algorithm will find a pickup time and notify the user. The ordered items will be ready for delivery as the user reaches the store. The user can checkout either via online payment or by scanning the QR code. You can also locate the store nearby to avail this service.
2	SAFNA NASRIN V.P SUKRITHA K JITHIN J.P BAZIL K GUIDE: NOORA.C.T	CHILD PROTECTION Child Protection is a complete solution for ensuring the safety of kids. Now a day the crimes against children are widely increasing. While a crime happens against the child we didn't have any option to find the current location of our child. This system provides the facility to find the location of child simply with the help of an android mobile. Child Protection system gives a facility to monitor the motion of a child .The system will provide some facilities such as find the current location of the child. This system will provide exact address of current location with great accuracy.. Each parent can monitor the movements of their children by using this android application. In this paper, I use GPS system to trace the location of the child.
3	SHYAM.M NITHA FATHIMA HARSHA GUIDE: R.SUJITHRA	VIRTUAL MEDICO Usually, people may consult doctor and he will identify their illness and prescribe the necessary medicines. But there can be situations where we will not be able to do a direct consultation especially in the present days of the pandemic. As a solution to that, our app contains an intelligent Virtual Doctor which will authenticate or validate the medicines or illness predicted by a normal doctor. The main advantage of this app is, it will help the user to find out the medicines that are available near to the pharmacies from where the user is using the app (through position navigation) and will sort the price of the medicine available in the pharmacies and helps the user to buy the medicine at the lowest price available near to him. Also, he is able to find the nearest labs and their respective tests.
4	MOHAMED NIHAL ADARSH KP SUHANA SHERIN GUIDE: FAREEDHA.P	WEB APPLICATION FOR ORDER MANAGEMENT SYSTEM Nowadays, at this time of pandemic situation of Covid19 and people are not able to left out of their home due the lockdown and for the safety of their health for purchasing their essential goods even the medicine to their home, as this may be big issue that people would be facing at this time. So by watching the latest requirement of the era we had planned to develop a web application in which the order processing state to the delivery of the goods to the people. We had built the web application as a CRM (Customer Relation Management) .The main motive of our team to build up the software is to get the people their required household materials to their home in single call.
5	SAHLA SHIRIN VISHNU NV VYSAKH S SHAMIL BABU GUIDE: R.SUJITHRA	ONLINE DESCRIPTIVE EXAMINATION SYSTEM The descriptive exam system consists of checking of answers sheets and attending theory exam online. The system consists of staffs, students and admin. The whole system will be controlled by the admin. Students can attend the descriptive exam through the app and submit to the system automatically evaluate answer and pass to the staff for the verification
6	AJAY RAJ M ABDUL HASEEB CV SHANIL FASEELA P S GUIDE: NOORA.C.T	ULTRALOCK Ultra lock is windows based system security software for enhanced privacy protection and data security. It aims at giving complete control to users and preventing data theft. It works with Bluetooth and internet. The users add his personal Bluetooth device which can be a smartphone, bluetooth headset or even a smartwatch, to the program. Whenever the device is no longer in the range of the PC , the program automatically locks down the PC within seconds.
